

Product description:

ASME B16.34 design standard

Product features:

- 1.The seat is fixed by the axial pressure of the bonnet and fixing cage, with such feature as automatic alignment during installation, good concentricity ,high precision, tight shut-off, low leakage, compact structure, simple maintenance, low use cost, etc.
- 2.The friction and blocking between the cage and plug can be effectively avoided so that the valve service life is long with good stability and reliability.
- 3.Good sealing performance, low friction, high control precision, fast response ,small dead band
- 4.Good interchangeability of parts lowers inventory of users and reduces use cost.
