

Product description:

Cowinns dual plate wafer check valve has a shorter face-to-face dimension and dual plate design, the end connection options include wafer type, lug type and double-flange type. This series of valves are widely used in oil & gas production, petroleum refining, petrochemical, pulp & paper, shipbuilding, and other fluid back flow prevention application.

Dual plate wafer check valve features:

- 1.Small and light, tightly sealed, easy in maintenance.
- 2.Two torsion spring are used excreting on each of the pair valve plates, which close the plates quickly and automatically.
- 3.The quick-close action.
