

Productdescription:

Features:

A one-piece integralforging incorporating up 3 ball valve or mixture of ball and needle design

Improved safety : leakpaths reduced by up to 60%

Reduced costs :installation and component costs saving up to 70%

Reduced weight : up to80%

Reduced susceptibilityto problems caused by vibration.

Bi-directional

Floating ballprincipal with dynamic response seats featuring inherent self relief

Anti blowout stem

Anti static design asstandard

Low torque operation

Fire safe designed tomeet BS 6755/API 607,(optional)

Design Standards:

ANSI / ASME B 16.34 -Designed to meet the pressure and temperature requirements

ANSI / ASME B 16.5 -Flange dimensions

ANSI / ASME B 1.20.1 -National pipe threads

API 607 / BS 6755 -Fire safe designed

Material and pressurerating:

Body material:A105/F316/F55/MONEL etc

Seat:RPTFE/PTFE/PEEK

Port size:1/2"~3"

Pressurerange:150LB~2500LB
