

## Product description:

ASME B16.34 design standard

There are two styles of valve available, providing excellent pressure and flow control on steam gasses and various liquid applications:

Cowinns control valve is a single port, globe-style body with composition or metal seats and a balanced push-down-to-close valve action plug.

The end connections are ASME Class 150, 300 and 600 Raised Face, or Ring Type Joint flanges as per ASME B16.34-latest edition.

Available in LCC, WCB, WCC, WC9, C5, Monel, and CF8M SST body materials. Other materials will be available upon request.

Sour Service Capability

Optional NACE MRO175/ISO15156-2009
