

Cowinns power plant minimum flow recirculation control valve range:

Diameter 3/4"~12"

Pressure 600LB~2500LB

Flow characteristics

1,Linear

2,Equal percentage

3,Quick opening

Structure

Main forgings , circulating convection structure one of our patents

Main body material

A105 12Cr1MoV F22 WC9,etc

Typical valve

minimum flow recirculation control valve, spray water control valve, boiler air exhaust valve, etc.
