

Design standard: API602

Inspection and Test: API 598

Face to face: ASME B16.10

Final connection size: HG/T 20615

The Piston control valves have a wide range of applications in various sectors in which flow control must be precise and the prevention of the reflux is fundamental. The common applications of the Piston control valves include: oil and gas industry, industry of the Chemical transformation, water treatment sector, energy generation sector, pharmaceutical industry The Piston control valves are essential components in a wide range of sectors in which flow control must be precise and the prevention of the background is critical. Commonly in the applications where there are high pressure, high temperature or corrosive fluids.
