

Product description:

Cowinns Bellow sealed valves

Design standard :ASME B 16.34

Face to face: ANSI B16.10

Test and inspection standard :API 598

Size:1/2"-12"(15-300mm)

Classes:150-2500LB

Materials: Carbon, stainless, alloy, nickel alloy steel

Features:

1. Bellow seal element. The key part of bellow sealed globe valves is mental bellow. It is the connection between cover and stem with automatic roll welding. The mental bellow can keep the stem part no leakage.
2. Benefit from the conical and streamline shape design, the disc has a reliable seal and longer service life.
3. Double seal design (bellows + packing). Bellow and packing can protect against leakage and provide an excellent seal.
4. Grease nipple. It can directly lubricate the stem, nut and sleeve.
5. Ergonomic handwheel. It provides longer service life and easier operation.
6. Application temperature : -196°C ~ 600°C
