

Product description:

Features:

2pcs Split body, side entry design

Anti Blow-out Stem: The stem is made separately from the ball. The lower end of the stem is designed with an integral shoulder to be blowout-proof.

Anti-static Device: The Antistatic Device is a standard feature of the Cowinns ball valve.

A spring-loaded pin assures the electrical continuity between the ball, stem and body, to avoid sparking during of the stem to open and close the valve.

Super Fire safe design:

The trunnion ball valve feature : the ball is fixed and the seat rings are floating, the fluid load due to the differential pressure acting on the surface of the ball is carried by the bearing, while the necessary seating action is obtained by the action of the fluid pressure on a relatively small annular area of the seat

rings.
